

The pacemaker in Heavy-Duty Filtration

We filter it

- The widest product range
- First-Fit Quality
- State-of-the-art technologies
- Unique worldwide warranty
- Excellent Service and support

THE WIDEST PRODUCT RANGE

Fleetguard is a world-leading supplier of filtration systems and products for heavy-duty applications, both on and off highway.

Fleetguard offers an enormous range of both air and liquid filtration, complemented by an important range of cooling systems products.

All products benefit from Fleetguard's OEM associations and ISO 9001 standards. With more than 5000 individual products Fleetguard is able to serve a huge and diverse range of applications and customer needs.

Our goal is to minimize engine downtime, and to lower overall operating costs. The Fleetguard range focuses particularly on the **Truck and Bus, Construction & Mining, Agricultural, Forklift, Material Renting and Rail** sectors. **Marine, Industrial and Power Generation** users are also well served by our broad product range.

INNOVATIVE TECHNOLOGIES

Fleetguard is a Division of Cummins Inc., the world's largest producer of diesel engines over 50hp. Together with Cummins and a host of other worldwide OEM's, Fleetguard works on developing radical and innovative solutions for the harsh conditions and demands of new engine technology and legislation.

The patented Venturi (by-pass) range of products offer greater efficiency, longer life and extended oil service intervals to engine designers and operators alike.

Fleetguard's StrataPore media - a unique and sophisticated filter media, manufactured by Fleetguard - is a synthetic, melt-blown, multi-layer media offering unrivalled filtration efficiency and capacity.

Our range of ES (Extended Service) products and the new ConeStaC centrifugal filter ranges bring additional user benefits, and in addition to many other developments, we believe they fully justify our claim to technological leadership in filtration.

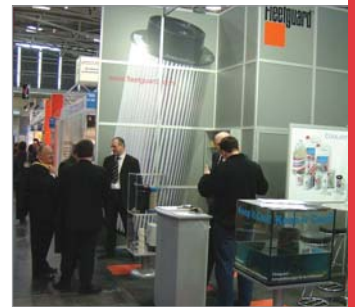

FIRST FIT QUALITY

There are more than 100 Fleetguard engineers around the world, supported by many technicians, researching and developing new filtration solutions.

More than 140 Original Equipment Manufacturers worldwide, like **Cummins, Case New Holland, DAF, John Deere, Iveco, Komatsu, Liebherr** and **Scania** work with Fleetguard to develop the protection and advanced solutions that only a specialist producer can offer.

Fleetguard products are designed to meet, or exceed, all OEM specifications and our unique "no quibble" warranty provides each end-user with the security and quality assurance they demand.

EXCELLENT SERVICE & SUPPORT

Acting local to ensure customer satisfaction. Within Europe, Africa and the Middle East, our manufacturing and distribution centres located in **Belgium, France, the UK and in South Africa** ensure fast availability to our widespread distributor network. Customer Service personnel are available to handle enquiries about products, shipments and order status. Members of the Fleetguard Sales force throughout the region ensure that distribution partners are well served and that all the benefits of

Fleetguard are well communicated to the market and potential new customers. In addition, a team of dedicated Technical Service Engineers is based in each operation, ready to deal with any question regarding filtration or associated applications.

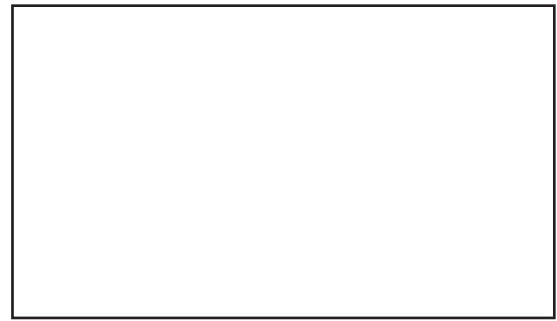

If you'd like to know more about our products,
or solutions for your individual environment,
